

Community Connections Support Services - Policies and Procedures

Section	Health and Safety Policy and Procedures
Subject	Incident Reporting (HS040)
Applies To	Employees and Subcontractors
Effective Date	September 1996
Last Revised	August 2018

Policy: Community Connections Support Services (CCSS) strictly adheres to guidelines for reporting incidents established within CLBC and WorkSafe BC policy. All incidents must be documented and reports must be submitted within established time-lines to the appropriate persons / agencies. Employees and subcontractors will be trained in procedures for incident reporting including prevention, identification, reporting, and corrective actions.

Procedures:

Step 1: Determining what type of incident has taken place

The first step in following necessary protocols for reporting incidents is to determine which one of the following categories the incident falls under:

Critical Incidents are those incidents that involve or impact a person receiving services from CCSS. Critical Incidents are defined by CLBC as “Serious or unusual events that involve an individual accessing services funded by CLBC that occur while service is being delivered” (CLBC, 2016). The following incidents are defined as reportable critical incidents according to CLBC Critical Incidents Policy (2016):

1. Abuse:
 - a) Emotional Abuse
 - a) Financial Abuse
 - b) Physical Abuse
 - c) Sexual Abuse
2. Aggression between Individuals
3. Aggressive / Unusual Behaviour
4. Attempted Suicide
5. Choking
6. Death
7. Disease / Parasite Outbreak
8. Fall
9. Medication Error

Community Connections Support Services - Policies and Procedures

10. Missing / Wandering
11. Motor Vehicle Injury
12. Other Injury
13. Neglect
14. Poisoning
15. Restricted Practices:
 - a) Exclusionary Time Out
 - b) Restraint
 - c) Restriction of Rights
16. Service Delivery Problem / Disruption of Services
17. Unexpected Illness / Food Poisoning
18. Use of Seclusion
19. Use or Possession of Illicit Drugs or Misuse of Licit Drugs
20. Weapons Use

It is mandatory for all CCSS employees and subcontractors to be familiar with CLBC definitions for critical incidents and reporting requirements. For a full description of CLBC definitions for critical incidents, please see hs040.1.

Please note: CLBC further categorizes incidents of any allegations for abuse or neglect or unexpected death as critical incidents that are urgent in nature.

Non-Critical Incidents are those incidents that involve or impact a person receiving services from CCSS but are not incidents defined as critical according to CLBC policy. A non-critical reportable incident is defined as one or more of the following:

1. Injuries not requiring hospitalization
2. Medication errors that do not result in adverse reaction to the person supported and/or not requiring doctor's intervention or hospitalization
3. 'Near Misses' – any situation that may have resulted in a critical incident but was avoided due to circumstances or intervention.
4. Threats of suicide
5. Aggressive behaviour toward others that does not result in injury
6. Choking that resolves on its own (ie. does not require any first aid treatment or medical assistance)
7. Falls that do not result in any injury or result in minor injury not requiring medical attention
8. Illness that does not require medical assistance or hospitalization
9. Weapons: possession of a weapon

Community Connections Support Services - Policies and Procedures

Health and Safety Incidents are those incidents that involve or affect a person employed by CCSS or the general safety of the worksite. A health and safety reportable incident is defined as one or more of the following:

1. Utility failure
2. Medical event of an employee
3. Communication failure
4. Threat of violence in the workplace
5. Violence in the workplace resulting in injury of an employee (must also follow up with a WorkSafe BC Employer Incident Investigation form hs040.5)
6. Third party injury
7. Bomb threat
8. Unsecured medication or hazardous and / or noxious substances
9. Equipment failure
10. Natural disaster
11. Fire
12. Structural Damage
13. Breach of protocol resulting in potential for injury
14. Motor vehicle accident not resulting in injury to any occupant (must also refer to hs110 Motor Vehicle Accident Reporting Policy)
15. Incident or accident in the workplace resulting in injury to an employee (must also follow up with a WorkSafe BC Employer Incident Investigation form hs040.5 and all other WorkSafe BC protocols for reporting injury of an employee. See pp350)
16. Contamination of drinking water or a boil water advisory

Step 2: Reporting the incident

Critical Incidents

1. Using the **right form**: All critical incidents must be reported using the CLBC Incident Report (CIR) form. A copy can be found in CCSS policy at hs040.2.
Employees can access the CIR form on dropbox and on the CCSS website at team.commconn.ca. Home Share Providers are able to access the CIR form on the CCSS website at homeshare.commconn.ca or obtain a copy from their CCSS home share coordinator. In addition, all employees and subcontractors can access the CIR form on the CLBC website at <http://www.communitylivingbc.ca/wp-content/uploads/CriticalIncidentReport.pdf>
2. Reporting within the **right timelines**:
 - a) Urgent Incidents (any allegation of abuse or neglect, unexpected death)
 - Employees and subcontractors are to notify their service coordinator or home share coordinator immediately. The service coordinator or home share coordinator is to call the local CLBC liaison analyst to notify them of the urgent incident immediately. If the incident takes place when CLBC offices are closed, the service coordinator or home share coordinator is to call the MCFD After Hours Office at 310-1234 and leave a

Community Connections Support Services - Policies and Procedures

- message with details of the urgent incident.
- A Critical Incident Report form is to be completed and faxed to the local CLBC office within 24 hours. Employees can fax these reports directly to CLBC. Home share providers can provide the CIR to their home share coordinator to fax to CLBC within 24 hours.
- b) All other Critical Incidents
- Employees and subcontractors are to notify their service coordinator or home share coordinator immediately and complete a CIR form.
 - The completed CIR form is to be submitted to the service coordinator or senior home share coordinator within 24 hours. The service coordinator or senior home share coordinator will review the CIR and sign it before faxing it to the local CLBC office. The CIR form must be faxed to CLBC within five (5) working days.
3. Notifying the **right people**: As noted above, CLBC and CCSS are to be notified of any critical incident involving a person receiving support.

CCSS Kelowna 275 Rutland Rd North,
Kelowna, BC

Kelowna, BC
V1Y 9X9
Fax: 250-712-5426
Phone: 250-712-3610

In the event that the person supported is also actively under supervision of Developmental Disability Mental Health (DDMH) and/or Health Services for Community Living (HSCL), please contact your local offices and leave a message informing them that a critical incident has occurred, the names of person(s) involved and notification that a Critical Incident Report

Community Connections Support Services - Policies and Procedures

has been submitted to CLBC.

Castlegar:

DDMH	phone: 250-304-1251	HSCL	phone: 250-365-4339
	fax: 250-304-1245		fax: 250-365-4303

Cranbrook:

	fax: 250-417-2531		fax: 250-420-2243

Creston:

DDMH	phone: 250-304-1228	HSCL	phone: 250-428-3606
	fax: 250-304-1228		fax: 250-428-3606

Kelowna:

DDMH	phone: 250-868-7788	HSCL	phone: 250-980-1400
	fax: 250-868-7791		fax: 250-980-1501

Once all parties are notified of the CIR, the Service Coordinator or Senior Home Share Coordinator is to enter the information into the CCSS online CIR form.

Non-Critical Incidents

1. Using the **right form**: Non-critical incidents, as previously defined, are to be reported using the CCSS Non-Critical Incident Report (NCIR) form. This form can be found in CCSS policy at hs040.3.

Employees may also find this form on dropbox and on our website at team.commconn.ca.

Employees are also provided with a link to an online fillable form at each worksite for ease of reporting.

Subcontractors may find this form on our website at homeshare.commconn.ca. Home share providers may also request a copy of the form from their home share coordinator.

2. Reporting within the **right timelines**: Non-critical incident report (NCIR) forms are to be completed and the service coordinator or home share coordinator is to be notified within 24 hours of the incident.

3. Notifying the **right people**:

Employees are to ensure that a hard copy of the NCIR is stored in the records of the person supported for residential support. The Senior Support Worker is to enter the information into the CCSS online NCIR form. Community support workers are to provide a hard copy of the NCIR to their service coordinator who is to enter the information into the CCSS online NCIR form.

Subcontractors are to ensure that they store a copy of the NCIR in the records of the person supported and also provide a copy of the NCIR to their home share coordinator who will enter the information into the CCSS online NCIR form.

Community Connections Support Services - Policies and Procedures

Health and Safety Incidents

Please note that this report form is for employee use only.

1. Using the **right form**: Health and Safety incidents, as previously defined, are to be reported using the CCSS Health and Safety Incident Report (HSIR) form. This form can be found in CCSS policy at hs040.4. Employees can also find this form on dropbox.
2. Reporting within the **right timelines**: HSIR forms are to be completed by the employee(s) involved in or witness to the incident. Reporting timelines will differ depending on the nature of the incident. CCSS has developed a workflow chart to assist employees in following reporting guidelines for Health and Safety incidents. This workflow chart can be found in policy at hs040.5 Workflow for Completing HSIR.
 - a) An incident resulting in employee injury or an incident that had the potential to result in employee injury: The affected employee is to immediately notify their service coordinator by phone that an incident of this nature has occurred. The employee must also email the service coordinator a copy of the completed HSIR within 24 hours of the incident. If the employee is unable to complete the form, the service coordinator will do so on their behalf. If there is an injury, please refer to policy pp350 for more information. For further information on determining potential for injury, please refer to hs040.5 Workflow for Completing HSIR.
 - b) An incident not resulting in employee injury or an incident with no potential for injury: The employee is to complete a Health and Safety incident report and provide a copy to their Health and Safety officer. The Health and Safety officer is to review the HSIR within one (1) week before submitting the form.
3. Notifying the **right people**: Notification procedures will also differ depending on the nature of the incident being reported.
 - a) Incidents resulting in employee injury or an incident that had the potential to result in employee injury:
 - i. The employee notifies their service coordinator by phone and emails a copy of the HSIR to their service coordinator. If the employee cannot complete the form, the service coordinator is to do so on their behalf.
 - ii. The service coordinator must email a copy of the HSIR to the CCSS Health and Safety Coordinator or the Director of Strategic Management within 24 hours of the incident.
 - iii. The Health and Safety Coordinator or Director of Strategic Management will then determine if a WorkSafe BC Employer Incident Investigation is necessary (see policy hs061 Employer Investigations – Health and Safety) and follow procedures to complete the investigation.
 - iv. Once the investigation is completed, the results will be shared with the service coordinator who will then fill in the necessary sections of the HSIR and provide the completed HSIR to the site Health and Safety officer for review.
 - v. The Health and Safety officer must review and finalize the HSIR within one (1) week of the incident, submit a copy of the finalized report to dropbox and complete the on-line HSIR Summary and submit.
 - vi. All recommendations arising from the Employer Investigation must be addressed in a timely way and completed within one (1) month of the incident according to timelines established in the WorkSafe BC Employer Investigation report. The Health and Safety Coordinator or Director of Strategic Management is to be notified of progress on recommendations as action steps are implemented.

Community Connections Support Services - Policies and Procedures

- b) An incident not resulting in employee injury or an incident with no potential for injury:
 - i. Employees are to ensure that a hard copy of the HSIR is submitted to the site health and safety officer
 - ii. The Health and Safety officer and service coordinator must review the HSIR within one (1) week of the incident to determine follow up action steps, where applicable, include the follow up on the HSIR form, sign, date and provide a copy of the report to dropbox.
 - iii. The Health and Safety officer must also enter the information onto the CCSS online HSIR Summary within one (1) week of the incident.
 - iv. All recommendations for follow up will be reviewed with the support team at the following team meeting. Action steps, where applicable, must be completed within one (1) month of the incident.

Step 3: Incident Follow-up

There are a number of reasons that an employee or subcontractor may be contacted by CCSS management for follow-up on an incident shortly after it has been reported:

1. **Insufficient information:** Sometimes more information is needed to 'resolve' the incident than that which is provided in the report form. The information may be unclear or confusing and follow-up is required to clarify the situation.
2. **Repeated incidents:** Incidents that are reoccurring may indicate a much larger concern. CCSS management may follow-up to determine if support needs have changed for the person supported, if there may be indication of an emerging disease or condition for the person supported, if more resources are needed or environmental accommodation is required.
3. **Need for multi-level reports:** Sometimes an incident may indicate the need to report on the events of the incident to other authorities. For example: a CIR that reports aggressive behaviour by the person supported may have resulted in violence and injury to an employee. In this event, it would be necessary to also complete a HSIR and also follow standards established by WorkSafe BC for CCSS to conduct an Employer Incident Investigation (see hs040.5).
4. In cases of reported CIRs that are urgent in nature, CCSS may need to contact the employee or subcontractor to determine if immediate safeguards need to be put in place to minimize the risk exposure to the person supported. In addition, CLBC is likely to open an Adult Guardianship Investigation into allegations of abuse or neglect. This may require CCSS to follow-up with the employee or subcontractor for more information and set up a time for interview.

Step 4: Analyzing Incidents

A written analysis of all incidents is completed annually in the Community Connections Support Services Annual Incident Review. This formal review addresses the following:

1. Identification of all Critical and Non-Critical Incidents across all services areas.
2. Possible causes.
3. Identified trends.
4. Actions for improvement.
5. Identification of necessary education and training of personnel and subcontractors.
6. Prevention of recurrence.
7. Internal reporting requirements.

Community Connections Support Services - Policies and Procedures

8. External reporting requirements.

The Annual Incident Review is reviewed by leadership and actions for improvement are noted in the agency's quarterly Performance Improvement Plan.

Step 5: Determining Methods to Prevent or Minimize Incidents

1. **Health and Safety:** Community Connections Support Services has established a health and safety committee with health and safety officers posted at each service site. As part of our commitment to risk management and minimizing potential hazards, health and safety officers are expected to take note of any health and safety concerns, run drills and ensure emergency preparedness for the people they serve. Problem areas are to be addressed in a timely way and remedied as soon as possible. It is the expectation of CCSS that all personnel are familiar with Health and Safety Policies and Procedures as well as individualized emergency planning specific to the needs of the people they support.
2. **Individualized Planning:** Each person supported has an up-to-date individualized planning document (ISP or 6 month summary) that identifies health concerns, potential risks to safety in all domains, as well as medical diagnoses and medication needs. All supports are to be familiar with this information and any protocols established and safeguards put in place to ensure the safety and well-being of the person supported. Where applicable, comprehensive Behavioural Support Plans and Safety Plans are to be maintained for those requiring them as a proactive approach to minimizing risks for the person supported, personnel and the person's community.
3. **Training:** Regular training in areas of health and safety such as: incident reporting, First Aid, MANDT, infection control, medication management, support protocols specific to the persons supported, evacuation procedures, emergency management, and risk management will be offered to all personnel, subcontractors and persons supported on an annual basis.
4. **Risk Assessment:** Comprehensive and detailed risk assessments are completed for all employees and all those supported by the agency. Risk Assessments are reviewed semi-annually to ensure that adequate controls are being implemented to reduce or eliminate risk.
